Art Unit: 1711

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Plassmann.

Plassmann discloses solvent containing (page 11, lines 8-9), primer (page 12, line 15) coatings comprising a curing (hardener) component made from reacting a polyisocyanate, preferably having a functionality of 3-4 (bottom page 7), with a silane, preferably having a secondary amine (bottom page 8). He reacts this hardener with a binder component (page 3, line 25). His preferred polyisocyanate are biurets or isocyanurates of hexamethylene diisocyanate (HDI) (page 7, line 23), and Kubitza shows, in Polyisocyanate C of col. 4) that HDI biurets typically comprise 23.5 wt. % isocyanate (NCO) content. On page 10, lines 6-7, he shows the same ratio of NCO/silane. He teaches using this primer on polymeric substrates (page 11, line 30).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1711

4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Plassmann in view of the Japanese reference to Nissan.

5. Plassmann discloses the primer of the invention (see above rejection). He differs from claim 13 by not disclosing a top layer over the primer of an inorganic silicon coating.

6. The Nissan reference abstract discloses applying inorganic silicon coatings over polyurethane primers coated on polymeric substrates.

7. It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the top coat of Nissan over the primer of Plassmann for windscreen applications because the Nissan reference teaches polyurethane primers and Plassmann discloses polyurethane primers having improved adhesion.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Japanese reference to Natoco also shows coatings made from a polyisocyanate component consisting of HDI biurets reacted with silanes.

9. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

•Art Unit: 1711

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
